

FORPAK

innovative stacking solutions

www.forpak.com

Auto Transfer

The Forpak Auto Transfer was designed to place stacks of product directly into the flights of your flow wrapper at the rate of:

- 60 Transfers, 2 stacks per flight / per minute
- 80 Transfers, 1 stack per flight / per minute

Flexibility by Design

The Forpak Auto Transfer offers built-in flexibility to feed products of most sizes and shapes with minimal changes into your flow wrapper.

For additional information about the Forpak Auto Transfer please visit www.forpak.com

Product Features

- All Auto Transfer are built to last with stainless steel construction
- Full wash down capability to simplify cleaning protocols
- Will interconnect to any flow wrapper

Hygienic and Sanitary Design

- NSF 3A Standard
